

## Screening and Prevention of Type 2 Diabetes

This webinar will provide a brief overview on the current estimates of the diabetes epidemics. Risk factors for type 2 diabetes and how to screen for people at increased risk of type 2 diabetes will be presented. In addition, the speakers will present the current scientific evidence in preventing or delaying the onset of type 2 diabetes in randomized clinically controlled trials and field trials. In the end, webinar participants are encouraged to discuss with the presenters various aspects of diabetes epidemiology
